kameshkotwani

kameshkotwani

A driven and experienced Data Scientist committed to unlocking the value of data with modern analytical models, machine learning and data visualization. Seeking to leverage expertise in SQL, R, Python, Scala and Tableau to develop dynamic dashboards, aiming to utilize knowledge and experience to become a valuable asset to the company.

CERTIFICATIONS

Machine Learning with Generative AI (August 18, 2023)
Udemy

Apache Spark with Scala 3 (August 01, 2023)
Udemy

Big Data Analytics (May 09, 2021)
CDAC India

Apache Kafka
Udemy

R Programming A-Z
Udemy

Databricks Certified Associate Developer - Apache Spark
Udemy

SKILLS

- Python
- Scala
- Hadoop
- Airflow
- Spark
- SQL
- SPSS
- Django/Flask
- Docker
- Machine Learning
- Deep Learning
- Tableau/Power BI

AWARDS

Project Edify (April 01, 2016)
Gyan Ganga College of Technology

secured second prize for coming up with an elegant solution to helping students share and download notes and assignments.

WORK EXPERIENCE

IQVIA (IMS Health) (June 29, 2022 - August 24, 2023)
Big Data Engineer for AIML
Scala/Hadoop/Spark/Python/Scala

- Spearheaded multiple AI/ML projects within the company.
- Proficiently employed tools such as Hadoop, Apache Spark, and Airflow.
- Designed and constructed Airflow pipelines for seamless automation of data processing.
- Developed automation scripts, significantly reducing time and workload—a highly appreciated contribution.
- Worked extensively on Apache Spark to optimize and decrease data processing pipeline runtime.
- Created an internal UI tool for proposing command-line workloads, enhancing user engagement and accessibility.
- Hands-on experience with Python for Airflow and Scala for Spark framework and Hadoop.

CDAC, Govt. Of India, Pune (October 28, 2021 - June 24, 2022)
Project Engineer for Kanthasth Python, Machine Learning, NLP

- Engaged in diverse projects, showcasing adaptability and proficiency.
- Worked with Flask and Django to develop robust applications.
- Constructed a Natural Language Processing tool using spaCy and a text blob library to process client-provided text.
- Implemented automated scripts, significantly reducing manual task time.
- Contributed to the Kanthasth project by CDAC, involving the development of an AI chatbot (https://kanthasth-rajbhasha.gov.in/).
- Collaborated on creating a Translation Memory tool for language translation.
- Developed a user-friendly UI using the Streamlit library for Python, enhancing team engagement in model testing.
- Led an internal research project focused on Natural Language Processing for the team's advancement.

PROJECTS

Movie Recommendation Web App
ML

A basic movie recommendation system that recommends the top five movies based on the content of the input movie.

https://share.streamlit.io/kameshkotwani/movie-recommender/app.py

WhatsApp Chat Analyzer
Analyzes chat shared by user

An extensive WhatsApp chats analyzer that takes in user-exported chat and performs in-depth analysis of the chat such as most active users.

https://share.streamlit.io/kameshkotwani/wapp-analyzer/app.py

EDUCATION

The University of Sheffield (September 25, 2023 - September 25, 2024)
Masters in Data Science, Data Science
TBD

As a student of Masters in Data Science, I have had the opportunity to do work the analytical tools such as SPSS. For visualization, I have worked with Tableau/Power BI. I have also worked with Big Data Tools such as Spark, Hadoop and many more.
