INTERESTS

Data Engineering	Deep Learning
Machine Learning	DevOps Automation

OBJECTIVE

Data-driven, enterprising, and Analytical Data Engineer with two years of experience. Eager to leverage my Machine Learning, Big Data skills, and certifications to procure a challenging and rewarding role and promote process optimization while growing as an established Data Engineer.

WORK EXPERIENCE

IQVIA — (June 2022 - Present)
Big Data Engineer

- Working on ETL pipelines using Airflow, Spark, and Scala.
- Working on Airflow Monitoring and Automation
- Working on Hadoop, and Spark for Data Warehousing and processing.
- Optimizing code base for multiple scenarios.
- Worked closely with Spark and Hadoop team to optimize the runtime of Spark jobs.
- Working on optimizing airflow codebase.

Centre of Development for Advance Computing, Pune, India — (October 2021 - June 2022)
Project Engineer

- Django application with Natural Language Processing Statistics.
- Created Python automation scripts to improve workflow.
- Created a tool to test language models using the Streamlit library.
- Optimized a front-end with better response and UI.
- Created a Django application that inputs files and processes the sentences according to company requirements.
- Implemented sentences analysis tool with the spaCy library.
- Created a chatbot using JavaScript for Kanthasth Web UI.

PROJECTS

Movie Recommendation Web App
https://share.streamlit.io/kameshkotwani/movie-recommender/app.py

A basic movie recommendation system that recommends the top 5 movies based on the content of the input movie.

WhatsApp Chat Analyzer
https://share.streamlit.io/kameshkotwani/wapp-analyzer/app.py

An extensive WhatsApp chats analyzer which takes in user exported chat and performs indepth analysis of the chat such as, most active users, high frequency word, most active time and much more. Made and deployed with streamlit.

Book Recommender
https://share.streamlit.io/kameshkotwani/book-recommender/app.py

A collaborative filter Book Recommender which shows the top 48 books of all time and also recommendation feature to show top 5 similar books.

VSCode Search Extension
https://marketplace.visualstudio.com/items?itemName=kameshkotwani.google-search

An effective search utility to directly search from the application, opens in browser, with over 40K downloads.

Portfolio Website
https://kameshkotwani.github.io

To Do List using Django
https://github.com/kameshkotwani/todo-list

A simple yet intuitive web app created for personal use, to keep track of tasks, with authentication as well as deployed at heroku.

Face Mask Detector using openCV and TF

EDUCATION

Sunbeam Institute of Information Technology, Pune — (May 2021 - September 2021)
PG-Diploma Big Data Analytics — 8.3

Indulged into in-depth knowledge of Big Data using Hadoop, Spark, Kafka, Airflow, Ansible, Hive, HBase, MongoDB, SQL, and any more niche technologies, graduated with honors.

Gyan Ganga College of Technology, Jabalpur — (August 2016 - September 2020)
Bachelor's Degree Computer Science & Engineering — 8.29

Graduated with in-depth knowledge of Computer Science fundamentals such as OS, DBMS, DS/Algo with honors degree.
